Dear members of the ESID Junior,

I would like to express my interest in becoming the ESID Junior country representative for Iran.

It has been a great honor and privilege for me to work closely with great professors in the field of immunodeficiency in Iran, the late Prof. Aghamohammadi, Prof. Rezaei, and Prof. Abolhassani, ... I am recently training as a Ph.D. student at the specialized Research Center for Immunodeficiencies in Iran, and I am collaborating with a few projects in the immunodeficiency field.

I have some schedules to create teams to awareness clinicians, and researchers in my country to attend the different ESID webinars, as I routinely do that. This opportunity to represent my country as the ESID junior country representative was an excellent opportunity to coordinate local and global ESID Junior activities and interests. In view of the high number of family marriages in my country and the high prevalence of immunodeficiency patients, it has provided the opportunity for extensive studies in Iran, on the other hand, updated information among clinicians and researchers should be presented. My plan is to encourage local scientists, researchers, and physicians to join this valid society.

Furthermore, my connection with clinical specialties and researchers in the Pediatrics Center of Excellence can provide a good opportunity to present ESID goals.

Finally, I am extremely motivated to be Iran's ESID Junior representative.

Yours sincerely,

Nazanin Fathi
