

Motivation letter

I am currently working as Assistant Professor of Pediatric Clinical Immunology and Rheumatology, Allergy Immunology Unit, Department of Pediatrics, Postgraduate Institute of Medical Education and Research (PGIMER), Chandigarh, India after completing my 3-year post-doctoral fellowship in Pediatric Clinical Immunology and Rheumatology from the same department in 2018.

I have been an active junior member of ESID and several other international scientific organizations. I am the junior country representative from India for Asia Pacific Society for Immunodeficiencies (APSID) [2020-2024].

I congratulate the current ESID junior working party for carrying out exceptional work in last 2 years with regard to dissemination of knowledge about PIDs and motivating young doctors to pursue this field.

As country representative from India for ESID, I wish to motivate young doctors in my country to pursue this specialty and to promote knowledge on PIDs by organizing CMEs and webinars. As an active junior member of the ESID, I am always willing to put in efforts to improve the activities of the ESID junior working party.

I look forward to working with ESID in this endeavour.
