ESID SECRETARIAT

Dear ESID SECRETARIAT

I'm Dr Sangeetha Siniah a Consultant Paediatrician from Malaysia . I've been interested and actively involved in the care of patients with Primary Immunodeficiency or Inborn Errors of Immunity (IEI) since 2017, which then sparked my interest to pursue it a subspecialist program, and finally got a fellowship grant, by the Ministry of health Malaysia to specialize in Paediatric Infectious Disease and Clinical Immunology. I'm into my final year and currently attached at the Clinical Immunology and Allergy unit at the Post Graduate Institute of Medical Education and Research (PGIMER) Chandigarh, India ,under the mentorship of Professor Surjit Singh.

When I complete my fellowship, I will be going back to work with the Ministry of Health Malaysia as their first candidate in this field. Being in this position will help to push for health policy reforms and increasing awareness for the patients with IEI in Malaysia.

I'm currently a medical advisor to the patient organisation group MyPOPI (Malaysian Patient Organisation Group for Primary Immunodeficiency) and a member of the APSID (Asia Pacific Society for Immunodeficiency), MSAI (Malaysia Society of Allergy and Immunology) and APAAACI (Asia Pacific Society of Allergy, Asthma and Clinical Immunology)

I'm a mother of 2 young boys and love exercising to keep myself mentally and physically healthy. I'm especially interested in patient advocacy and the mental health, well-being and quality of life, apart

Kuala Lumpur, Malaysia

from physical well being of patients with IEI's and would like to be more actively involved in that in the future.

I think I would gain a lot from becoming a candidate as a ESID Junior Country Representative and look forward to the opportunity.

Sincerely,
Sangeetha Siniah
