

Dear Mr/Mrs,

I would like to be my country representative for ESID Juniors. I attended PID development school 2022 and PICD workshop 2023. By these wonderful organizations i became a part of ESID family. I am excited about the opportunity to contribute to ESID team to set up new organizations and educational activities in immunology field from participants from all over the world.

I have completed my PhD in immunology field 2023, and pediatric residency recently. I am very interested in PIDs, in our country there are high rates of PID patients. I would like to be a part of pediatrics and immunologist community.

During my pediatric residency I was the Medical Resident Committee Leader for 2 years. I was the team leader of 8 resident director committee for 250 pediatric residents at Ankara Etlik City Hospital. During this period, we managed working organizations also educational activities. Also, i communicated a lot with professors and department chiefs and many of resident colleagues. It was a great experience for organization and problem solving.

Thank you for considering my application.

Sincerely

Nezihe KÖKER
