

Geraldine Blanchard-Rohner is the head of the unit of Pediatric Immunology, Vaccinology and Rheumatology, in the University Hospital of Geneva. She takes care of children with primary immunodeficiency and disorders of immune regulation. She did the most part of her clinical training in Paediatrics Immunology and Vaccinology at the Children's Hospital of Geneva with Professor Claire-Anne Siegrist. She also spent one year in Zürich and one year in Vancouver at the Children's Hospital of British Columbia, where she did a fellowship in paediatric Immunology and Rheumatology.

She also holds a DPhil in paediatric immunology and vaccinology from the University of Oxford. In parallel to her clinical activity, she is doing a lot of teaching for medical students and young paediatricians in the field of Immunology and Vaccinology. She is also conducting many translational research projects in the field of paediatric Immunology and vaccinology.

She has written a book on vaccination for immunocompromised children and publish many articles in the field of immunology and vaccinology.
