

Dear ESID Members,

I am writing to express my strong interest in serving as Treasurer on the ESID board. As a dedicated immunologist with over five years of experience at Great Ormond Street Hospital for Children, I am eager to contribute my expertise and passion to our esteemed Society.

The field of immunology has experienced unprecedented growth, with ESID consistently at the forefront of progress. Building on the foundation laid by our distinguished predecessors, we now face the exciting challenge of integrating cutting-edge technologies like deep phenotyping, machine learning, and artificial intelligence into our clinical practice for inborn errors of immunity. As Treasurer, I am committed to ensuring that these advancements become accessible to all, not just a select few.

My vision for the role of Treasurer extends beyond mere financial management. I aim to:

1. Maintain and grow our financial resources responsibly
2. Allocate funds strategically to support innovative research and educational initiatives
3. Ensure financial transparency and accountability to all ESID members
4. Explore new funding opportunities to expand our programs and reach

ESID has always been more than just a professional organization; it's a lifelong community and an immunology family. As Treasurer, I will work tirelessly to strengthen this community by:

- Supporting grants and projects that foster collaboration among members
- Ensuring financial stability for our conferences and networking events
- Investing in resources that benefit early-career immunologists

My background in clinical immunology, combined with my passion for advancing our field, makes me well-suited for this role. I bring a forward-thinking approach, balanced with deep respect for ESID's rich history and traditions.

It would be an honor to serve as your Treasurer, helping to guide ESID into a future filled with innovation and discovery. Thank you for considering my application. I look forward to the opportunity to contribute to our Society's continued success.

Sincerely,

Maike Kusters, MD, PhD
Consultant Paediatric Immunology, GOSH
Honorary Associate Professor, UCL
London, UK
